Legislative Counsel's Digest:

Existing law establishes requirements concerning the control, prevention and treatment of the human immunodeficiency virus and other sexually transmitted diseases. (NRS 441A.240-441A.336) **Section 1** of this bill requires, with certain exceptions, a physician, physician assistant, advanced practice registered nurse or midwife who provides or supervises the provision of emergency medical services in a hospital or primary care to a patient who is at least 15 years of age to: (1) consult with the patient to ascertain whether he or she wishes to be tested or assisted with obtaining testing for sexually transmitted diseases and to determine which tests, if any, are medically indicated; and (2) to the extent practicable and that testing is medically indicated, test a patient who wishes to be tested for sexually transmitted diseases or help such a patient obtain a test. **Section 1** similarly requires a hospital that provides emergency medical service or primary care to a patient who is at least 15 years of age to ensure such consultation and the provision of such testing or assistance. A physician, physician assistant, advanced practice registered nurse, midwife or hospital is not required to comply with those requirements if the patient is being treated for a life-threatening emergency, has recently been offered or undergone such a test or lacks the capacity to consent to testing. **Sections 1-6** of this bill provide that a hospital, physician, physician assistant, advanced practice registered nurse or midwife that fails to comply with the requirements of **section 1** is not subject to a criminal penalty or an administrative fine imposed by the State Board of Health, but is subject to disciplinary action where applicable. **Section 6.5** of this bill makes an appropriation to the Division of Health Care Financing and Policy of the Department of Health and Human Services for the costs of providing testing to persons who are covered by Medicaid.
